

COMPOSTABLES

THE KEY TO RECYCLING EVERYTHING

Conventional disposables create recycling challenges by mixing plastic and card. Add in food contamination, and recycling is even less likely.

Vegware makes packaging from plants, not plastic. Our disposables are designed for commercial composting with food waste. Food contamination isn't a problem, it's a vital ingredient for composting.

INTRODUCING OUR NEW COMPOSTING COLLECTION SERVICE IN BRISTOL, GLOUCESTERSHIRE AND WORCESTERSHIRE

Now we're making recycling simple, launching our own collection service.

BOOST ALL RECYCLING

Once food waste and Vegware share one bin, there's no food contaminating your dry recycling bin. That's why in foodservice, compostable packaging is the key to recycling everything.

EXPERT SUPPORT

Our Environmental team offers full support to help you Close the Loop. This includes bin signage, communications, staff training and engagement.

COMPOST – VITAL TO UK FOOD SECURITY

- UK soils are in crisis, with only 30 harvests left before fields are barren. Compost can reverse this trend, feeding British soil, to grow crops and feed British consumers.
- Unlike liquid fertilisers, compost improves soil structure. This reduces rain run-off and therefore flood risk.
- Composting is local recycling in the UK, not exporting waste across the world.
- Composting keeps all organic materials out of landfill, and produces a useful new product, whilst also reducing carbon emissions.

CREATING COMPOST FROM CATERING WASTE

Vegware holds independent compostability certification and have conducted extensive trials in organics recycling facilities.

COMPOSTABLE
IN INDUSTRIAL FACILITIES
Check locally, as these do not exist in many communities. **Not suitable for backyard composting.** CERT # 2122186

Our composting collection ensures your Vegware gets to local composting, where it can be properly processed. We also provide a clean bin with every collection.
